

WIESENTHALHÜTTE *by Ornela*

Wiesenthalhütte produces 77 different transparent and opaque colors. Each rod weighs approximately 0.60 kilos. Wiesenthalhütte colors are also available in a variety of frits and powders for an additional \$3.75/kg. Old formula Wiesenthal (97-99 COE) is available on a special order basis. All Q-Colors, Kugler, Wiesenthal, CR-Colors and FA Powders may be combined for quantity discounts. Part numbers listed are for rod. To order frits and powders, add -0, -1, -2, or -3 for frits and -0P for powder to the end of the rod part number. For Example: W-5220 = Rod, W-5220-0P = powder, W-5220-0 = size 0 frit.

We have arranged each color in the list below from Light to Dark. The lightest colors are on the top of the list and the darker colors are on the bottom. This a general guide for selection only. It can be helpful in choosing colors when, for example, you want to know whether a particular color is lighter or darker than another color - just look above or below the color, the one on top is generally LIGHTER and the one below is generally DARKER.

New Plastic storage jars available, see page 173.
