

BEAD MAKING KITS

We have two basic beadmaking kits. The STARTER KIT includes a Hot Head torch and includes everything you need to get going. The PROFESSIONAL KIT includes the Minor burner. Both kits can accomplish all kinds of flame working and both are used by professionals. However the Minor uses oxygen and is a surface mix torch which allows you to adjust for different kinds of flames, it's a lot hotter and very quiet. The add-ons are groups of tools that help you manipulate the glass better to make more elaborate designs.
