

MOTHER OF PEARL POWDERS

These powders can be used in a variety of ways to create sparkles inside the glass or as a mother of pearl luster on the exterior of the piece.

The Mother of Pearl powder can be used in the following ways:

1. Gather clear and roll hot glass in Mother of Pearl powder. Heat piece in glory hole or torch. Excess powder which has not melted on surface of the glass can be removed by dipping the piece in water or by scraping it off with the flat surface of the jacks or other tool. If you want to encase the piece, gather more clear glass. At this point you can create colored sparkles by applying a layer of transparent color over the initial gathers.
2. If you want a layer of sparkles over a color it is best to case the color in clear before applying the Mother of Pearl powder.
3. Mix Mother of Pearl powder with your glass and apply to the exterior of the piece.
4. Sift Mother of Pearl powders into a carbonized mold to get a pearlescent finish on your sand castings.

Also it is probably a good idea to sift the powder on some thing other than the marver since it easily becomes airborne and also sticks to metal. We hope this product will add sparkle to your line of glass work

1 pound bags

1 ounce jars

MOTHER OF PEARL COLORS

We have several new Mother of Pearl colors. Available by the pound or in 1 oz jars. Sold by the jar. All Mother of pearl colors may be mixed for quantity discounts. All "HI" colors are highlight colors. They look white in the jar, but shimmer a colors when applied to glass.
